

PhatBack Kit For Your Harley-Davidson Touring Model

Published by [Cyril Huze](#) August 27th, 2010 in [Accessories](#), [Builders](#), [Customs](#) and [Editorial](#).

Not really my style but I understand that some of you can like it. From a young company I just discovered – they incorporated in 2008 – the PhatBack RT (RT for rumble trunk) is conceived to extend the cruising aspect of your bagger with a concealed storage compartment that opens like a rumble seat.

It's a kit weighting 34 pounds, measuring 76"L x 22"W x 22"H, with a 1.0 cu ft of storage (17"H x 7"D x 11"W) that you can install in two hours and remove in two minutes with no frame modification.

It's made of hand-laid fiberglass with reinforcement at mounting points for full frame support. It includes solo seat pan (King/Queen optional) and the kit is delivered primed and ready-to-paint. MSRP is \$2,799, lights and trunk hardware are not included. [Old Skool Cycle Werks](#).
